

Quantic™ Wenzel

EMPLOYEE SUCCESS STORY

Diana Balieva

Purchasing and Requisitions

Back in 2018, Diana joined Quantic Wenzel in an inventory control management capacity. She excelled quickly in that role, gaining a thorough understanding of our inventory mix and associated demands. With a strong work ethic and a commitment to giving her all she was promoted to our purchasing and requisitions Team. In this new role Diana ensures the timely requisition of critical materials so our engineering and operations teams can deliver precision radio frequency and microwave devices for mission-critical applications. She continues to enjoy working for Quantic Wenzel with passion and a strong commitment to help deliver world-class solutions to our customers.

I have been always inspired by the warm and professional culture at Wenzel. The company continually supports my professional growth and rewards a good work ethic with opportunities for advancement. I am grateful to be a part of the Wenzel team.
